

Qlik Sense Analytics test results

Here we present our runtime statistics when using the Qlik Sense Analytics tool to solve random instances of the warehouse problem with different attributes. Every attribute is either of the value 'Low' or 'High'. The first table displays what high and low for the different attributes represents.

Attribute \ Value	Low	High
Demands	Demands on $\frac{1}{4}$ of all products	Demands on all products
Sparsity	No warehouses are empty	$\frac{1}{2}$ of all warehouses are empty
Products	Warehouses have at least 0 of each product	Warehouses have at least $\frac{1}{5}$ of the maximum demand of each product

Furthermore a column having the value '**' means that it did not terminate within a reasonable time frame (>12 hours). A value of '***' means that we did not bother to run the instance at all since the problem is considered harder than a previously unfinished problem.

Appendix C. Qlik Sense Analytics test results

Size	Type			Branches	Optimal Value
	Demands	Sparsity	Products		
10x10	Low	Low	High	2	4
	Low	Low	Low	3	4
	Low	High	High	1	2
